

***a workshop for
Early Childhood educators***

Science is everywhere! This workshop will help you to connect science to all areas of the curriculum, and help you see the science in your everyday routines. Teachers will walk away with simple ideas to incorporate science throughout their day.

Come for the workshop, and stay to explore the museum. The Maryland Science Center is free for all Maryland public, and private school teachers. After the workshop, stop by our ticket desk with your teacher I.D. or a pay stub, and get a wrist band to enjoy our many exhibits, our demo stage, and our planetarium!

Let's science
