

Corporate Membership at the Maryland Science Center

Corporations, small businesses, and fellow non-profit organizations who join the Corporate Membership Program help support the Maryland Science Center's mission to inspire, empower, and engage. The program helps to fund free admission to all Maryland schoolchildren, their teachers, and their chaperones on field trips during the academic year (this includes public, private, parochial, and homeschools). The Corporate Membership Program also helps fund the Science Center's various outreach programs throughout the State and beyond. The outreach programs reach audiences in all of Maryland's 23 counties and Baltimore City.

As a Corporate Member, your company is part of an esteemed list of fellow companies who understand the importance of providing access to informal STEM education to all. As a private 501(c)(3) non-profit organization, the Science Center relies on the support of the Corporate Members to help provide inspiring and engaging STEM programming to our many visitors and audiences. In turn, your company's yearly tax-deductible membership allows your employees and guests free admission and exclusive discounts to one of the country's foremost informal science institutions.

Take a look at the levels and benefits and please consider joining the Maryland Science Center's Corporate Membership Program!

Congratulations to the Maryland Science Center on 50 meaningful years of STEM education! At Grace, we share your love of science education and applaud your important work and critical STEM education programs that are vital for the future of our Maryland community and beyond. As a Science Center supporter for more than 45 years, and a corporate member for over 35 years, Grace is proud to recognize your enduring impact and we look forward to continuing our partnership to inspire the next generation of scientists, innovators, and leaders.

Ed Sparks, CEO
W. R. Grace & Co

At M&T we're committed to making our community better, and our corporate membership is not only a way for us to give back to the community at large, but also for our employees and their families to enjoy and explore science. The Maryland Science Center's impact goes far beyond its Inner Harbor location. We are proud to participate in a program that helps fund outreach programming to classrooms, assembly halls, and community centers throughout Maryland. We are delighted to partner with the Maryland Science Center, as our relationship provides us with the opportunity to contribute to the advancement of informal science education in the community and provides a valued benefit to our employees.

Augie Chiasera, President
Greater Baltimore/Chesapeake Region
M&T Bank

A HISTORY AS RICH AS THE SCIENCE IT SHARES

The Maryland Science Center has been sharing its love of science since its inception as the Maryland Academy of Sciences in 1797.

As Maryland's oldest scientific institution and one of the oldest such institutions in the entire nation, the Academy was an amateur scientific society whose members met to discuss papers and to advance understanding of "natural sciences." With the opening of the Maryland Science Center at Baltimore's Inner Harbor in 1976, the Academy fulfilled its vision of establishing a permanent location dedicated to engaging, interactive science.

From astronomy to paleontology, the human body to physics and phenomena, the Maryland Science Center is packed with innovative exhibits that demonstrate the wonders of scientific discovery with a focus on open-ended exploration.

The Science Center provides interactive science experiences for families, students, educators, and learners of all ages. We offer a variety of exhibits, live science demonstrations and activities, as well as the St. John Properties IMAX Theater, Davis Planetarium, and Crosby Ramsey Memorial Observatory. These exhibits provide the backdrop for an audience-driven experience that is enhanced through staff interaction.

For almost 50 years, the Maryland Science Center has provided valuable educational experiences at our location in Baltimore City and through outreach programming across the mid-Atlantic region. No other Maryland institution dedicated to informal science education reaches more students and teachers.

**We are the Maryland Science Center. We inspire. We empower. We engage.
